Yacht containment systems, fixtures and fittings

...we've got it covered in Spain

Techno Craft S.L. offers a premier service for luxury yacht refinishing

Yacht Containment Systems - incorporating modular fast-fit scaffold, erected by trained and certified employees. Safe and easy scaffold towers on wheels are also available for hire - any size. We only use quality shrinkfilm plastic and can cover yachts/masts/booms either in the water or on hard standing.

Fixtures and Fittings - we can clear the decks prior to a refit or paint work - all deck fittings, navigation and radio communication equipment are photographed, labelled, removed, inspected, replaced or renewed. All items are cleaned and re-polished before refitting.

Get under cover and in control with Techno Craft
